

أسئلة كتاب التمارين

الطرح بإيجاد عشرة

أجد ناتج الطرح بإيجاد 10:

1

$$12 - 4 =$$

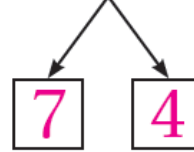

$$12 - \underline{2} = \underline{10}$$

$$10 - \underline{2} = \underline{8}$$

$$12 - 4 = \underline{8}$$

2

$$17 - 11 =$$

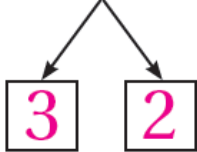

$$17 - \underline{7} = \underline{10}$$

$$10 - \underline{4} = \underline{6}$$

$$17 - 11 = \underline{6}$$

3

$$13 - 5 =$$

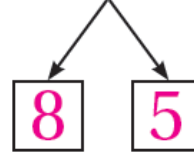

$$13 - \underline{3} = \underline{10}$$

$$10 - \underline{2} = \underline{8}$$

$$13 - 5 = \underline{8}$$

4

$$18 - 13 =$$

$$18 - \underline{8} = \underline{10}$$

$$10 - \underline{5} = \underline{5}$$

$$18 - 13 = \underline{5}$$

أحط 10، ثم أطرح:

5

$$13 - 8 = \underline{5}$$

6

$$11 - 7 = \underline{4}$$
